COLLEGE

**ASCENT COLLEGE  
ANNUAL RESEARCH REPORT**

**ACADEMIC YEAR 2020-2021**

## **I. Introduction**

### **A. Background/History of the Institution**

Bethel Bible Institute (BBI) was founded by Dr. John Mannion in 1996 for the purpose of training missionaries and church leaders. Pastor Ron Johnson, who was a sectional presbyter with the Potomac District, assumed the presidency. By 1997, BBI was approved by the Potomac District of the Assemblies of God as a training institute to provide the educational requirements for credentialing ministers at the certification and licensing level with the Assemblies of God.

In 1998, Rev. Stuart Ross was appointed as director to lead the school for training pastors, evangelists, missionaries, Christian education workers, and lay ministers. Rev. Ross was instrumental in positioning the school for the training of Hampton Master's Commission students and local pastors. In 2002, Pastor Ron Johnson appointed Dr. Terry Minter as President of Bethel Bible Institute. Pastor Johnson and Dr. Minter envisioned a four-year college and began the transition from a Bible Institute into a college that awards both bachelor's and associate's degrees. In 2005, Bethel College was incorporated in the Commonwealth of Virginia as a separate non-profit corporation (501(c)(3)) and was certified to operate as an in-state, non-profit college by Virginia. Also in 2005, The Association for Biblical Higher Education, an accrediting agency recognized by the U.S. Department of Education, granted applicant status to Bethel College, with candidacy status following in 2009, with institutional accreditation in 2013. Dr. Mark Wootton accepted the position of president in May 2017. Dr. Wootton left in Dec 2018 and Dr. DeBerry was appointed as the interim president. Dr. Robert Rhoden accepted the presidency in 2019. Since then, the college has changed its name to Ascent College, been endorsed by the Potomac Network as a training institute for ministers in the Potomac Network. The college continues its mission of training ministers with both online and in-class delivery modalities.

In 2006, Bethel College moved into a new facility with a new library and several new classrooms to be shared with Bethel Temple Church. This campus remains to be the only in-class campus for Ascent College.

### **B. Institutional Mission and Goals (Intentions)**

Ascent College's institutional mission is summarized in one sentence: With a student first philosophy, Ascent College exists to cultivate the ministry call of Christian men and women to fulfill their destiny through sound Biblical education and leadership development. Ascent College provides exemplary postsecondary education from a biblical perspective by uniting comprehensive academic learning and practical ministry experience in order to prepare students spiritually, practically, and academically for professional and lay ministry. Therefore the programs of the college revolve around this aim. Because our focus is training men and women for lay and professional ministry, our educational requirements intentionally reflect a heavy concentration on biblical studies and ministry-related courses. All students irrespective of the degree plan are required to take a core of

courses related to Bible and ministry. In addition, both the two-year and four-year programs result in a degree in Christian leadership, with the four-year degree only offering concentrations in biblical studies, ministerial leadership, missions, worship and worshipping arts, and Christian counseling.

The institutional goals as displayed in the college catalog are:

1. Provide a sound biblical, theological, and hermeneutical competence, which prioritizes the authority of the Bible as the inspired Word of God and results in "rightly dividing" the biblical text with a renewal theology emphasis.

2. Provide a general education program that will equip students with the written and oral communication skills necessary to excel both in ministry and professional areas.

3. Provide a general education program which will equip students with quantitative and technological skills; develop a general understanding of natural science, social science, and the humanities from a Christian perspective; and give the students a view of their responsibility as Christian scholars in both the local and global community.

4. Prepare Christian men and women professionally for ministry. Be a leadership development and resource center for Bible believing churches and the community at large.

5. Provide academic support through computer facilities, library resources, and student support services to ensure quality instruction and a challenging academic environment.

6. Provide an environment that supports and encourages students in their personal, social, spiritual, and cultural development.

7. Develop students who are committed to a lifestyle of spiritual growth, fellowship, prayer, worship, and Christian service.

8. Develop students who demonstrate an understanding of a biblical worldview that integrates faith with learning.

9. Prepare students for successful personal and professional life by providing opportunities for them to develop a personal mission statement including Christian core values and ethics that will shape their vocational goals and lifestyle choices.

10. Train students to comprehend and communicate biblical and theological truth, and provide opportunities for students to participate in practical ministry within their respective communities.

11. Assess academic programs, academic support services, and institutional support services in a comprehensive systematic program that fosters continuous improvement.

12. Maintain efficient and effective administrative services and facilities to support all programs of the college.

13. Maintain sound financial management while focusing on programs and services vital to the mission of the college.

14. Optimize resources and generate revenue for programs through partnerships, donors, and grants.

This assessment plan focuses on measuring the college's effectiveness at accomplishing these fourteen institutional goals as well as program specific goals identified in the college catalog.

### **C. Process Employed for Development of the Assessment Plan**

Bethel College's original assessment plan ran its five-year cycle from 2007 through 2012. The first year of this initial five-year assessment plan assessed various parameters across the programs and offices in an attempt to assess some processes that are considered integral for the operation of the college. The measurement tools were used to evaluate these college processes on a routine and repetitive scheme for improved effectiveness. The second through fifth year of this initial assessment plan measured these processes repetitively as well as reviewing the academic programs at the college.

For the second iteration of the assessment plan Bethel College decided to focus on institutional and academic-program goals. Bethel College established a team of interested stakeholders to develop this second iteration assessment plan. The team was named the Bethel College Assessment and Strategy Team (BCAST) and was facilitated by the Executive Vice President of the college. The team first focused on the institutional goals and the development of measurements tools for each. Then program specific goals were reviewed to develop measurement tools for them. Operational behaviors that would exemplify goal accomplishment were developed for each, and with these operational behaviors in mind, measurement tools and performance indicators were brainstormed among the team. These operational behaviors, performance indicators and measurement tools were then organized into the following charts in this assessment plan. For each measurement tool, an implementation scheme was developed. The implementation schemes were then compiled into a listing of each task with responsible offices with dates and semesters to be implemented.

The assessment plan is divided into a five-year cycle with most goals having data collected and reviewed annually. There is also a longitudinal trend analysis requirement for many of the goals. At the end of each year in the month of June, the

college should prepare an annual institutional research report which summarizes the assessments during that cycle year with the issues identified and those corrective actions taken and those corrective actions awaiting budget support. Changes considered significant enough to warrant immediate implementation are placed before the board in their August meeting so that budget adjustments can be made prior to the fall semester. Other recommended changes requiring budget allocations are included in the proposed budget for the appropriate budget year in which implementation is projected.

#### **D. Participants in the Development of the Assessment Plan**

The participants included in the development of the original assessment plan included the Bethel College Assessment and Strategy Team and staff members. The Bethel College Assessment and Strategy Team consisted of representatives with education, business, and leadership expertise. While faculty and business representatives were consulted in the development of this second plan, staff played the prominent role in its development. The staff who assisted in developing this plan included the Registrar/Admissions Officer, the Student Affairs Officer, the Executive Vice President, and the President.

#### **E. Process for Renewal of the Assessment Plan**

This assessment plan is envisioned to be a dynamic plan that improves with use. During the cycle years of assessment, each measurement tool will be re-evaluated for effectiveness. If the measurement fails to yield the needed results, the failure will be acknowledged and new methods will be instituted. Necessary changes to the plan will be developed and implemented annually as needed. In addition, as the college grows in staff and programs this plan will be refined and redefined to satisfy the growing programs. So an important component of this plan is the continual reassessment of the plan itself to assure adequacy and improvement.

## **II. 2020-2021 Assessment**

### **A. Process for 2020-2021 Assessment**

Various measurement tools were used throughout the 2020-2021 academic year both in the fall and spring semesters. The data from these measurements were reviewed to determine if the college met the performance indicator. These results are displayed below with a roll-up of the improvements needed under the Conclusion section. Appendix 1 provides the action tasks needed with the estimate of resources, the designated responsible person, and the target date for completion of these improvements. Appendix 2 is a listing of expenditures keyed to the respective year's Annual Research Report.

Ascent College analyzed data gathered in the 2020-2021 assessment year to develop the 2020-2021 Research Report. Because of the loss of staff members over the

previous years and hiring of new staff, the Executive Vice President took the lead in analyzing data and preparing this research report.

## **B. Executive Summary**

Ascent College met the assessment plan performance indicators in several areas. One important area was in spiritual development, the students' perceptions of their spiritual development were rated Growing Steadily to Thriving across all five domains using the Spiritual Transformation Inventory (STI). This was the sixth year that Ascent College attempted to norm its spiritual development program against a national norm, with all years showing Growing Steadily to Thriving in all five domains. In addition, this year we compared an aggregate of the Freshman Group with the Senior Group and noticed a significant improvement from the Freshman Group.

The college normally uses the Noel-Levitz Student Satisfaction Inventory (SSI) to assess student perceptions in the areas of the academic and student services. Since the last assessment year was the sixth year that the college met or exceeded our performance indicators in these areas, it was decided to forego the assessment in this cycle and pick it back up in the next cycle year.

For the first year in the last several, Ascent College met the biblical knowledge goal. All graduates met this goal. As the new requirement for passing the Bible exam is fully implemented, this indicator should continue to demonstrate that we meet this goal.

With the new leadership of the college and its endorsement and support by our Network office, Ascent College has exceeded both its enrollment and funding-raising goals by significant amounts.

With this assessment report, Ascent College assessed the Worship concentration and the Diploma program. Conclusions from this assessment report are tentative since only one graduate in each was assessed. However, from the information collected it appears that the college is meeting its objectives in each.

In the past, Ascent College has had difficulty in finding the appropriate measurement tools for assessing the development of biblical worldview in our students. With the implementation of the Learning Outcomes Management Tools in our two learning platforms, Edvance360 and CampusSIS, we were using three of these outcomes to measure development of biblical worldview. However, with our new online learning platform, Populi, measurement of outcomes from course assignments is no longer possible. The college will need to explore other measurement tools for these assessments.

There were some areas where the college did not meet our performance indicators. One was in the area of critical thinking skills. For the sixth year we used the

Educational Testing Service Proficiency Tests focusing on writing and critical thinking skills. For the sixth year some of our graduates scored below the national norm in critical thinking skills, while our graduates scored well above the national norm in writing skills. We are continuing to emphasize some actions in the upcoming year that we anticipate will improve critical thinking skills. In addition, we will be implementing a module in the Academic Writing course that deals with critical thinking skills.

Another area where Ascent College did not meet our performance indicators was our graduation rate. While our performance indicator is 70% and our achievement was close, 67%, the college will be implementing some additional measures to assist at-risk students.

The library resources collection for certain programs needs to be improved as funds are available.

Ascent College has completed the five-year cycle on the current Five-Year Assessment Plan. The college will be instituting a new committee to strategize on developing a new Five-Year Assessment Plan. This plan will focus on streamlining and simplifying the assessment process and tools. This new plan will also need to develop an assessment plan for the Christian Counseling concentration.

## IV. Conclusion – Actions Required

### Actions required from this assessment

1. Need to develop another measurement tool for biblical worldview because the current one is no longer available.
2. Need to continue to place additional emphasis on writing assignments in classes and incorporate a module on critical thinking in the Academic Writing course.
3. Need to assure that the Noel-Levitz Student Satisfaction Survey is administered in the spring 2022.
4. Re-evaluate assessment plan since the 2018-2019 cycle completed the current five-year assessment cycle. Convene committee of stakeholders to develop the new five-year assessment plan.
5. Need to assure the Library Patron Survey is given Academic Year 2021-2022 in the Fall and then again in the Spring since it was not given in AY2020-2021.
6. Update library resources in the areas of Children's Ministry, Youth Ministry, Worship, and Psychology/Counseling as funds become available.
7. Strategize on improving graduation rates. For academic issues: Re-institute aggressive advising policy. Emphasize faculty involvement to assist at-risk students. For life situation issues: Utilize college chaplain to assist with at-risk students.
8. Revise Assessment Plan to delete the Learning Outcome tools as measure for demonstrating passionate lifestyle of worship for graduates of Worship and Worshipping Arts concentration. There are other measures already in place.
9. Need to develop another measurement tool to replace the Edvance360 & KanopySIS Learning Outcomes tools for program objectives in all concentrations because these Outcome tools are no longer available because we have switched Online Learning Platforms.
10. Alumni Survey needs to address how well students are doing in graduate studies.
11. Worship practicums and internships need to assure leading worship in congregational setting is involved in this mentorship for worship concentration student.

### Actions required from previous year's assessment which have not been implemented yet.

1. Develop assessment program for Christian Counseling concentration.
